The journey to the center of the earth dual audio eng hindi 720p movie 2018 is based on the novel of the same name by Jules Verne. A professor, his nephew, and their guide set out for Iceland to find evidence of a phenomenon that might change science forever. They take with them three tons of equipment including an eighty-foot deep drilling machine. Once they reach their destination, they begin drilling but are quickly stopped by unanticipated tremors followed immediately by an earthquake that sets off a landslide and buries them alive at the bottom of a crevasse. They awaken to find themselves in a subterranean world. The group must use their wits and scientific prowess to survive the perils of the subterranean world, including a giant squid, giant cockroaches and dinosaurs (including a "Tyrannosaurus rex"). The movie was released in July 2017 to generally negative reviews from critics who praised the special effects but criticized the lack of excitement in the film.
